With a will to break new ground, Dr. Raza Siddiqui's fresh outlook and unconventional approach to the healthcare sector is quite evident in his many high-profile achievements, both in India and the UAE. The Group CEO of Arabian Healthcare Group and Executive Director of RAK Hospital has been at the helm of several high-profile novel projects and turned them around into success stories.

From Apollo Hospitals in India to RAK Hospital in the UAE, Dr. Siddiqui's decades of experience and knowledge of medical sector reflects his passion and vision. During his tenure at Indraprastha Apollo Hospital, New Delhi, the flagship hospital of India's Apollo Hospitals Group, he successfully launched innovative concepts that brought premium healthcare to public's doorstep, promoted corporate health and wellness packages, while effectively positioning the hospital as the ultimate and most advanced in healthcare locally and internationally.

Moving to the UAE in the late 90s, he began working as Director Operations for Belhoul Specialty Hospital, Dubai, on the behalf of the Apollo Hospitals Group, India, for Dr. Juma Belhoul, the Former Director General of Health in the Government of Dubai. Under Dr. Siddiqui's charismatic management, the hospital was not only developed, conceptualized and launched but also embarked upon the journey to prestigious Joint Commission International (JCI) accreditation. Dr. Siddiqui was further entrusted with the responsibility of promoting India as the preferred medical tourism destination – a subject close to his heart. As a result of his professional and creative approach, he managed to arrange for treatment of hundreds of patients from the UAE and the region to India – just within a year.

Being the Group CEO of Arabian Healthcare Group in a competitive UAE healthcare sector has further highlighted Dr. Siddiqui's innovative approach towards the industry. When he began as the Executive Director of RAK Hospital in 2007, he was given the task of placing the newly-conceived institution on the UAE medical tourism map, while at the same time help to propel UAE as a pioneer in global medical tourism. To both ends, Dr. Siddiqui has been immensely successful, and under his trailblazing leadership, RAK Hospital has seen many firsts, not just in the institution, but in the entire country.
